JOURNAL

OF THE

AMERICAN WATER WORKS ASSOCIATION

VOLUME 38

1946

AMERICAN WATER WORKS ASSOCIATION
Incorporated
500 Fifth Ave., New York 18, N. Y.

Binding of the Year's Journals

Through the co-operation of the Library Binding Institute, an organization of binderies which specializes in binding publications into volumes, arrangements have been made to give information and assistance to A.W.W.A. members who want to have their JOURNALS bound. This work may be done in accordance with standards of materials and construction required for durability, service and accessibility by college, reference and public libraries. The American Library Association and the Library Binding Institute have co-operated in promulgating "Minimum Specifications for Class A Library Binding" based on research and production and performance experience.

A committee of the American Library Association has certified responsible and reliable library binderies which have proved able to meet these specifications. To obtain standard quality binding, simply request Class A binding at any certified bindery. In obtaining price quotations, state the three dimensions of the volume.

Names and addresses of certified binderies in your area are available from the Library Binding Institute, 501 Fifth Avenue, New York 17, N. Y. Before sending copies to the bindery:

1. Check for missing issues and check each issue for defects, missing pages, etc. Be sure to include the volume index.

2. Tie the twelve issues together carefully so that nothing is crumpled or torn.

3. Write out definite instructions giving your preferences on the following points:

a. Color of binding (one of the following standard colors should be selected: dark green, dark blue, black, brown or medium red).

b. Whether the advertising sections and/or paper covers are to be bound into the volume.

c. An exact copy of the text to be lettered in gold on the backbone. A common form is:

Journal—$1\frac{3}{4}$ in. from top	Vol. 00—$4\frac{1}{4}$ in. from bottom
A.W.W.A.—$2\frac{1}{4}$ in. from top	1900—$3\frac{3}{4}$ in. from bottom

d. If you have had JOURNALS bound before and want your set to match as closely as possible, send a previous volume as a sample. If you want an approximate match, send a "rubbing" of the lettering on a previous volume and indicate the color.

If satisfactory arrangements cannot be made, or if there is any difficulty, advise the A.W.W.A. office and steps will be taken in co-operation with the Library Binding Institute to assure you proper service.
